

WAIVER ADDS WEEK 9

11/3/2020

These five players should be targeted in most 12 team leagues and are currently rostered in less than 40% of Yahoo leagues.

JORDAN WILKINS - IND (7)

I don't understand this team sometimes. Drafting Taylor and then having the back-up (who was here before they drafted Taylor) out-snap him by a healthy amount. It was reported that Taylor is dealing with an ankle injury, which means the guy who just out-snapped him is now a spot start next week if Taylor misses time. Monitor the practice reports closely, and hopefully, a decision gets made by Friday.

J.D. MCKISSIC - WAS (8)

Facing against NYG, where he had his best game of the season, he will be a spot start this week in PPR formats. While Gibson has been impressive, he hasn't exactly taken over the lead role within this committee. I still expect Mckissic to get his double digits touches, which provides a floor that makes him valuable when dealing with bye weeks.

MECOLE HARDMAN - KC (10)

Recommended him a couple of weeks ago only to be rewarded with a goose egg was disappointing. However, coming off of his best performance last week, he has shown the upside that we all saw last season. Facing against CAR, I'm not particularly worried about the matchup. It just all depends on the opportunities he's given.

KENDRICK BOURNE - SF (11)

With the injuries, it almost gets to a point where you don't want to start anyone. Fortunately, Kyle Shanahan is preventing this from happening. If Aiyuk is somehow available, I will target him first, but Bourne is a decent flex option this Thursday if you need immediate WR help. Garoppolo's injury does concern me, but that will not deter me from placing a bid.

CURTIS SAMUEL - CAR (13)

It's not likely for him to repeat his performance last week, but with five targets over the past three weeks and his versatility in the run game, he is an intriguing option against KC. I want to add that this isn't a long-term add since I believe CMC's return will diminish his value. Even if CMC returns this week, I'll still consider him as a desperate flex option.
